Creating an online safety poster

For this week's primary activity we would like primary Digital Leaders to create an online safety poster. Creating an online safety poster is a great way to continue your responsibilities as a Digital Leader whilst schools are closed, by sharing your online safety knowledge in a fun way. Once completed you can then share your finished poster with members of your household.

For your poster to have the most impact it should focus on one particular subject. Some examples of topics you could cover are:

- The SMART rules
- How to manage your screen time
- Safe gaming
- Creating secure usernames and passwords

There are also many different options for the type of poster you can create. Below are some ideas for the format of your poster:

- Sharing top tips
- Sharing the definition of important online safety words
- Sharing an important message

Once you have finished your design, please share it with other people in your household. If an adult in your household allows you to you could even put this poster on display in a window so people in your community can benefit from it.

We would love to see photos of your posters and how you have displayed them. Please send them to leaders@childnet.com or tweet us at @ChildnetDL and you may have your poster design shared on Twitter or the Digital Leaders website.
